### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The filing of the certified English translation of the foreign priority document on June 13, 2006; the Terminal Disclaimer on May 24, 2006 and the statement of the common ownership in the response on May 24, 2006 obviate the rejection set forth in the Final Office Action on January 24, 2006.

Ito et al (US Patent No. 6,329,127B1) are cited of interest discloses in column 64, lines 17-30 a use of a binder having glass transition temperature preferably from 25°C to 70 °C in the backing layer because the protective layer and backing layer are brought into contact with various instrument. It has therefore known in the art to use a binder having glass transition higher than that claimed in the present invention. Accordingly, the back surface protective layer contains water-soluble polymer and polymer latex having glass transition temperature of -30°C to 24 °C in combination with a fluorocarbon compound containing a fluoroalkyl group having two to 12 fluorine atoms would have been found novel and unobvious to the one of ordinary skill in the art at the time the invention was made.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
